

# STANDALONE HDMI VIDEO RECORDER: CLONERALLIANCE BOX EVOLVE

## Overview

Model: CA-1180E

ClonerAlliance Box Evolve is a standalone video capture box to record videos from any video source to your USB flash drive/TF card/PC. The lag-free passthrough to your streaming video will let you focus on enjoying videos while recording. The schedule recording feature makes it possible to record videos automatically. Designed with two HDMI and one AV inputs, you can press one button and switch the ready input signal in real time, without plugging in and unplugging repeatedly, thus to protect your devices from damage.
