

STANDALONE HDMI VIDEO RECORDER: CLONERALLIANCE BOX PRO

Overview

Model: CA-998P

ClonerAlliance Box Pro is a versatile video capture box to record videos/gameplay from any video source. While keeping all functions of ClonerAlliance Box, it can play back the recorded videos on TV directly, define the output resolution and browse all contents (picture, music, movie, text) in the USB storage device with the included remote control. What's more, with a specially-designed USB port on the capture box as well as the management software HDML-Cloner Pro Helper, streaming videos can also be recorded to PC directly. ClonerAlliance Box Pro supports HDMI, VGA, AV and YPbPr input signals and can record videos automatically at a scheduled time.
